WALTER E. HENNIG
ORGANIZER AND PRESIDENT OF THE BOY SCOUTS WIRELESS CLUB.

Boy Scout Wireless Club.

Early last fall some twenty young men, members of various Boy Scout companies of the city, met at the School of Engineering and formed a Boy Scout Wireless Club. The main purpose of this organization was to stimulate a spirit of patriotism in the hearts of the young men, and at the same time to interest them and acquaint them with the elements of electricity. Meetings were held on the first and third Tuesday of each month, and under the leadership and direction of Mr. W. E. Hennig rapid progress was made.

Instruction was given in the wireless code, construction of wireless apparatus, and the elementary theory of wireless telegraphy. The boys received much benefit through this organization as several of them have first-class wireless licenses. Many of the members have become efficient in receiving and sending messages. Public demonstrations were given during the Motor Show at the Auditorium, and at the Hotel Wisconsin, at which time Governor Philipp honored the Club by sending a wireless message. On account of the war edict issued recently, it has become necessary to take down all apparatus, and at the present time the boys are anxiously waiting for peace — for — "Theory without practice does not prove interesting."

The officers of the club for the past year were as follows: President, W. E. Hennig; Secretary, Mr. Zetterlund; Treasurer, Mr. Pateck.

Phi Delta Omega Theatre Party

On Tuesday evening, April 10th, 1917, a Theatre Party was given at the Majestic Theatre under the auspices of the Phi Delta Omega Society. The object in view was to help raise funds for the "E. M. F." In addition to the regular program, a special demonstration in high frequency, using a 1,000,000 volt Tesla Coil, was given by Messrs. Chafee and Trowbridge. The evening was a brilliant success in every way. "Our Act" was excellent, "school spirit" was at its height, every one had an enjoyable time, and, above all, the party was a financial success.

SCHOOL OF ENGINEERING
OF MILWAUKEE
161-171 MICHIGAN ST. Milwaukee, Wis
DEMONSTRATION OF MAGNETISM ELECTROMAGNETISM & LIFTING MAGNETS
CHAFEE & TROWBRIDGE
DEMONSTRATION OF THE 2,000,000 VOLT TESLA COIL
DEMONSTRATION OF ELECTRIC FURNACE
ELECTROLYSIS

Exhibit of the School of Engineering of Milwaukee at the Milwaukee Motor Power Show held in the Auditorium from March 21 to March 24, 1917. Lectures were given by C. L. Chafee and D. F. Trowbridge, assisted by H. E. Clifton. Wireless stations were installed and supervised by W. E. Hennig, and operated by S. Hasemeier, E. R. Tompkins and the wireless club organized by the School of Engineering of Milwaukee for the Boy Scouts. The entire exhibit was promptly installed and was a pronounced success in every way due to the able management of Mr. H. D. Werwath.
